1. ADDITIVES FOR POLYMERS

Additives for Polymers bring you authoritative, independent and comprehensive coverage of the additives' industry worldwide, including: plasticizers, pigments, fire retardants, heat and light stabilizers, fillers and fiber reinforcements. Every month you receive a unique digest of business news, materials, new equipment and technology, market news, legislation and events. Full references or contact details are included to enable any item to be followed up easily and quickly.

2. AMERICAN WATER WORKS ASSOCIATION JOURNAL

AWWA believes it's important to develop and implement ways to enhance the skills and increase the effectiveness and professionalism of operations and maintenance personnel throughout the drinking water industry. Journal AWWA's goal is to be the internationally acknowledged authority on drinking water. Both a professional and a scholarly publication, the Journal publishes timely, technically accurate, peer-reviewed information about water quality, resources, and supply and about the management and operation of water utilities. The Journal provides information for a diverse, worldwide readership. As AWWA's flagship publication, the Journal also serves the association and the drinking water industry as a whole.

3. CHEMICAL & ENGINEERING NEWS (C&EN)

Chemical & Engineering News covers the scientific, technical, educational, business, and governmental aspects of chemistry, and includes reports on chemistry as profession and on the interactions between chemistry and society at large. Chemical & Engineering News contains the largest listing of jobs available to chemical professionals. Additionally, the classified and display ads from the two most recent issues of Chemical & Engineering News form the basis of the ACS Job Bank, available only to members.

7. CHEMICAL ENGINEERING RESEARCH AND DESIGN

Chemical engineering research and design aims to be the principal international journal for publication of high quality, original papers in chemical engineering. Papers showing how research results can be used in chemical engineering design, and accounts of experimental or theoretical research work bringing new perspectives to established principles, highlighting unsolved problems or indicating directions for future research, are particularly welcome. Contributions that deal with new developments in plant or processes and that can be given quantitative expression are encouraged. The journal is especially interested in papers that extend the boundaries of traditional chemical engineering. The journal brings current techniques and new design ideas together on all aspects of experimentation, development and theory from both the academic and industrial chemical engineering communities.

14. FERTILIZER INTERNATIONAL

Established over 30 years ago, Fertilizer International is a bi-monthly journal of record of fertilizer business throughout the world. Each edition contains a highly convenient and useful round-up of all the most important news and trends in fertilizer markets world-wide. There are also in-depth "behind-the-news" features, interviews with leading lights of the industry, country and company profiles, and reviews on trade, production, consumption, ports and technological aspects of handling, bagging and blending.

Fertilizer International's agronomic coverage comprehends developments in crop care, agrochemicals and responses to fertilizer use, including the benefits of multi-nutrient fertilizers, secondary nutrients and trace elements (micronutrients).

19. HYDROCARBON ENGINEERING

Hydrocarbon Engineering is a premier magazine for the international hydrocarbon processing industry. Hydrocarbon Engineering is committed to providing total industry coverage of the downstream oil industry worldwide. Reflecting changes across the industry and across the world from both an economic and technical perspective, Hydrocarbon Engineering is a forum for information exchange. The magazine is renowned for the quality of both its coverage and presentation and is respected as a leading publication for this sector of the global oil industry.

(Monthly)

20. HYDROCARBON PROCESSING

Hydrocarbon Processing contains articles that offer practical on-the-job information the reader can use in his or her work. Technical coverage is divided into petrochemical, gas processing and refining developments, process and construction engineering, maintenance and loss prevention, environmental, rotating equipment, and instrumentation and process control. The "Management Guidelines" section features articles on administration and supervision, economics, training, human resource development, labor relations and employment practices. Emphasis is on the practical. HP offers ideas, techniques and information to increase the reader's job proficiency and professional competence.

27. JOURNAL OF MANAGEMENT IN ENGINEERING

The Journal of Management in Engineering offers an avenue for researchers and practitioners to present contemporary issues associated with management and leadership for the civil engineer. The journal publishes peer-reviewed papers, case studies, technical notes, and discussions of interest to the practice of civil engineering. Management and leadership issues include contract management, project management, partnering, office management, professional practice and development, financial management, human resources management, marketing and sales, ethics, technology and innovation management, information management, continuing education, organizational theory, strategic planning, conflict management, negotiating, risk management, globalization, networking, change management, teamwork, team building, communication, mentoring, coaching, and diversity. Papers discussing legislative and regulatory issues, corporate and public policy, and the role of civil engineering in the political process at all levels of government are welcomed. Interdisciplinary studies and collaborations are encouraged. Theoretical papers submitted for publication should preferably include real-world applications of the techniques.

(Quarterly)

28. LOSS PREVENTION BULLETIN (LPB)

The Loss Prevention Bulletin (LPB), which was established in 1975, contributes to this process through the open sharing of information throughout industry. To archive its aims, it relies on organizations being willing to share their experience by providing details of incidents with learning potential. Articles published in LPB are essentially practical relating to all aspects of safety and loss prevention, including the prevention of environmental incidents. We particularly encourage case studies that describe incidents and the lessons that can be drawn from them.

(Electronic)

(Bi-Monthly)

29. MATERIALS PERFORMANCE (MP)

Covers the worldwide corrosion control market. MP provides methods and solutions to practicing engineers and other professionals involved in the prevention and control of materials degradation.

From corrosion control in industries like oil and gas to corrosion methods and applications across industries like coatings and testing, MP efficiently delivers editorial and advertising messages on the full spectrum of corrosion control subjects. Other coverage includes basic corrosion prevention tips, news and activities of worldwide corrosion control projects and engineering societies, and NACE international news and standards.

(Quarterly)

43. PRODUCTION AND OPERATIONS MANAGEMENT

Mission of production and operations management is to serve as the flagship research journal in operations management in manufacturing and services. The journal publishes scientific research into the problems, interest, and concerns of managers who manage product and process design, operations, and supply chains. It covers all topics in product and process design, operations, and supply.

www.poms.org

ISSN : US 1059-1478

(Electronic)

(Quarterly)

44. PRODUCTION PLANNING AND CONTROL

Published eight times a year, Production Planning & Control is an international journal that brings together research papers on all aspects of production planning and control and the management of operations in all industries. The journal focuses on research that stems from an industrial need and can guide the activities of managers, consultants, software developers and researchers. It publishes accessible articles on research and industrial applications, new techniques and development trends.

51. WATER RESEARCH

Water Research publishes refereed, original research papers on all aspects of the science and technology of water quality and its management worldwide. A broad outline of the journal's scope includes:

- Treatment processes for water and wastewaters, municipal, agricultural and industrial, including residuals management.
- Water quality standards and the analysis, monitoring and assessment of water quality by chemical, physical and biological methods.
- Studies on inland, tidal or coastal waters and urban waters, including surface and ground waters, and point and non-point sources of pollution.
- The limnology of lakes, impoundments and rivers.
- Solid and hazardous waste management, including source characterization and the effects and control of leachates and gaseous emissions.
- Environmental restoration, including soil and groundwater remediation.
- Analysis of the interfaces between sediments and water, and water/atmosphere interactions.
- The application of mathematical and modelling techniques.
- Public health and risk assessment
